

EX.NO:10 IMPLEMENTATION OF FILE HANDLING

PROGRAM:

```
import java.util.Scanner;
import java.io.File;
class Demo
{
public static void main(String[] args)
{
Scanner input=new Scanner(System.in);
String s=input.nextLine();
File fl=new File(s);
System.out.println("File Name:"+fl.getName());
System.out.println("Path:"+fl.getPath());
System.out.println("Abs Path:"+fl.getAbsolutePath());
System.out.println("Parent:"+fl.getParent());
System.out.println("This file is:"+(fl.exists()?"Exists":"Does not exists"));
System.out.println("Is file:"+fl.isFile());
System.out.println("Is Directory:"+fl.isDirectory());
System.out.println("Is Readable:"+fl.canRead());
System.out.println("Is Writable:"+fl.canWrite());
System.out.println("Is Absolute:"+fl.isAbsolute());
System.out.println("File Last Modified:"+fl.lastModified());
System.out.println("File Size:"+fl.length()+"bytes");
System.out.println("Is Hidden:"+fl.isHidden());
}
}
```

OUTPUT:

```
D:/JavaPrograms> java FileDemo Fibonacci.java
File Name:Fibonacci.java Path: Fibonacci.java
Abs Path: c:\sameer\Fibonacci.java
Parent: Null
This file is:Exists Is file:true
Is Directory:false
Is Readable:true
Is Writable:true
Is Absolute:false
File Last Modified:1206324301937
File Size: 406 bytes
Is Hidden: false
```
